## FORVM'S MERLOT TECHNICAL PROFILE

### 1. ELABORATION

From self - made wines of Merlot, which we acetificate through a own technic, we obtain a powerful vinegar, that it still retains the initial wine's characteristics. Once we obtain the vinegar we add a little percentage of must, and we let it rest some days before bottling. The fact that we are using young Merlot wines is that they don't suffer any ageing, so we keep the fresh flavours and the purple colour, which means youth in this vinegar.

### 2. INGREDIENTS

Merlot Wine vinegar (mainly 65%) and grape must (35% aprox.).

### 3. INGREDIENT ORIGIN

Concentrated must : MOSTOS ESPAÑOLES (13700- Tomelloso)

Wine: Catalonia (mainly Penedès wine region)

### 4. ANALITIC DATA
